

Champion HUMITONE is a modifying and humectant solution containing ingredients such as glycerine and glycerine-like compounds blended with vegetable gums and Entrone.

It aids in controlling the drying action of formaldehyde, yet it does not affect the preservative qualities of formaldehyde.

HUMITONE is excellent for use in filling out emaciated tissue areas to the proper contour. The molecular size of the basic ingredient is such that the moisture-holding gums are retained in the tissues.

Use HUMITONE to counteract the various causes of dehydration in embalming:

- Air currents, drafts of air conditioning, fans, hot air (summer), heated air of winter, dry air with low humidity;
- Nature of the illness preceding death, such as high fever;
- Use of astringent cavity chemicals topically and internally.

## DIRECTIONS

To prevent dehydration during embalming - add 1-3 oz. of HUMITONE per gallon when non-lanolin arterial fluid is used. To restore moisture content to tissues - add 4-12 oz. of HUMITONE per gallon in last  $1-1\frac{1}{2}$  gallons injected. Always use intermittent or restricted drainage and delay aspiration if possible.

For maximum results, add one full bottle of HUMITONE to the last gallon of solution injected. While the last half-gallon is being injected, ligate the vein and continue to inject the remaining solution. This technique will aid in retaining HUMITONE in the tissues.

## BEFORE USING, READ SAFETY DATA SHEET. FOR PROFESSIONAL EMBALMING USE ONLY.

Safety Data Sheet according to the federal final rule of hazard communication revised on 2012 (HazCom 2012) Date of issue: 11/19/2018

Version: 2.0

| SECTION 4: First aid measures            |  |
|--|--|
| 4.1. Description of first aid measures   |  |
| First-aid measures general               | : Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).  |
| First-aid measures after inhalation      | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately get medical attention. If not breathing, give artificial respiration. Call a doctor.  |
| First-aid measures after skin contact    | : Flush with large amounts of water. Wash skin thoroughly with mild soap and water. Wash contaminated clothing before reuse. If skin irritation occurs: Get medical attention.   |
| First-aid measures after eye contact     | In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes<br>holding eyelids apart and consult an ophthalmologist. Remove contact lenses, if present and easy<br>to do. Continue rinsing. Get medical attention.                |
| First-aid measures after ingestion       | : If swallowed, rinse mouth with water (only if the person is conscious). Never give anything by mouth to a person who is not fully conscious. Obtain emergency medical attention. Call a POISON CENTER. Give water to drink if victim completely conscious and alert. |
| 4.2. Most important symptoms and effe    | cts, both acute and delayed  |
| Symptoms/injuries after inhalation       | : May cause allergy or asthma symptoms or breathing difficulties if inhaled.   |
| Symptoms/injuries after skin contact     | : Prolonged or repeated contact with the skin may cause dermatitis.  |
| Symptoms/injuries after eye contact      | : Causes serious eye irritation. symptoms may include stinging, tearing, redness, swelling and<br>blurred vision.  |
| Symptoms/injuries after ingestion        | : May cause nausea, vomiting and diarrhea . Can cause blindness. Death in extreme cases.   |
| 4.3. Indication of any immediate medica  | al attention and special treatment needed  |
| No additional information available      |  |
| SECTION 5: Firefighting measures         |  |
| 5.1. Extinguishing media                 |  |
| Suitable extinguishing media             | : Foam. Dry powder. Carbon dioxide. Water spray.   |
| Unsuitable extinguishing media           | : Do not use a solid water stream as it may scatter and spread fire. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.   |
| 5.2. Special hazards arising from the su | bstance or mixture   |
| No additional information available      |  |
| 5.3. Advice for firefighters             |  |
| Firefighting instructions                | : Approach from upwind. Exercise caution when fighting any chemical fire. Prevent fire-fighting water from entering environment. Cool closed containers exposed to fire with water spray. Use water spray or fog for cooling exposed containers.                       |
| Protective equipment for firefighters    | : Wear a self contained breathing apparatus. Do not enter fire area without proper protective  |
|  | equipment, including respiratory protection.   |

## Safety Data Sheet

according to the federal final rule of hazard communication revised on 2012 (HazCom 2012)

| SECTI  | SECTION 6: Accidental release measures                              |   |  |
|--------|---|---|--|
| 6.1.   | Personal precautions, protective equipment and emergency procedures |   |  |
| Genera | al measures   | : Avoid breathing dust, fume, mist, spray, vapors. Stop leak if safe to do so. Eliminate all ignition sources if safe to do so. |  |
| 6.1.1. | For non-emergency personnel   |   |  |
| Emerg  | ency procedures   | : Evacuate unnecessary personnel.   |  |
| 6.1.2. | For emergency responders  |   |  |
| Protec | tive equipment  | : Equip cleanup crew with proper protection.  |  |
| Emerg  | ency procedures   | : Ventilate area.   |  |
| 6.2.   | Environmental precautions   |   |  |

If the product has escaped into a water course, into the drainage system, or has contaminated the ground or vegetation, notify the competent authorities. Prevent entry to sewers and public waters.

| 6.3.  | Methods and material for containment and cleaning up |  |
|-------|--|--|
| Metho | ods for cleaning up                                  | : Contain and/or absorb spill with inert material (sand, vermiculite or other appropriate material), then place in suitable container. Collect all waste in suitable and labelled containers and dispose according to local legislation. Store away from other materials. Eliminate all sources of ignition, avoid sparks, flames and do not smoke in risk area. Ensure all national and local regulations are observed. Soak up spills with inert solids, such as clay or diatomaceous earth as soon as possible. Collect spillage. |

## 6.4. Reference to other sections

See Heading 8. Exposure controls and personal protection.

| SECTION 7: Handling and storage               |   |
|---|---|
| 7.1. Precautions for safe handling            |   |
| Precautions for safe handling                 | Provide good ventilation in process area to prevent formation of vapor. Avoid contact with skin,<br>eyes and clothes. Work in a well-ventilated area. When not in use, keep containers tightly closed.<br>Empty container retains product residue. Handle uncleaned empty containers as full ones. Wash<br>hands and other exposed areas with mild soap and water before eating, drinking or smoking and<br>when leaving work. Keep away from heat, sparks, open flames, hot surfaces No smoking. |
| Hygiene measures                              | Do not eat, drink or smoke when using this product. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work.   |
| 7.2. Conditions for safe storage, including a | any incompatibilities   |
| Technical measures                            | Provide local exhaust or general room ventilation. A washing facility for eye and skin cleaning purposes should be present.   |
| Storage conditions                            | Keep out of reach of children. Keep only in the original container in a cool, well-ventilated place<br>away from highly flammable substances. Keep container tightly closed and dry. Store away from<br>direct sunlight or other heat sources. Keep container tightly closed.   |
| Incompatible materials                        | Strong acids, bases. Oxidizing agents.  |
|   |   |

Safety Data Sheet according to the federal final rule of hazard communication revised on 2012 (HazCom 2012)

## **SECTION 12: Ecological information**

#### 12.1. Toxicity

| Glutaraldehyde (111-30-8)                     |  |
|---|--|
| LC50 fishes 1                                 | 7.8 - 22 mg/l (Exposure time: 96 h - Species: Lepomis macrochirus [static])  |
| EC50 Daphnia 1                                | 14 mg/l (Exposure time: 48 h - Species: Daphnia magna)   |
| LC50 fish 2                                   | 2.6 - 4.8 mg/l (Exposure time: 96 h - Species: Oncorhynchus mykiss [flow-through])   |
| EC50 Daphnia 2                                | 0.56 - 1.0 mg/l (Exposure time: 48 h - Species: Daphnia magna [Static])  |
| Methyl alcohol (67-56-1)                      |  |
| LC50 fishes 1                                 | > 12700 mg/l 96 hours  |
| EC50 Daphnia 1                                | > 10000 mg/l   |
| 2.2. Persistence and degradability            |  |
| HUMITONE                                      |  |
| Persistence and degradability                 | Not established.   |
| 2.3. Bioaccumulative potential                |  |
| HUMITONE                                      |  |
| Bioaccumulative potential                     | Not established.   |
| Glutaraldehyde (111-30-8)                     |  |
| Log Pow                                       | 0.22 (at 25 °C)  |
| •   | (=0, 0)  |
| 2.4. Mobility in soil                         |  |
| lo additional information available           |  |
| 2.5. Other adverse effects                    |  |
| Effect on ozone layer                         | : No additional information available  |
| Effect on the global warming                  | : No additional information available  |
| Other information                             | : Avoid release to the environment.  |
| ECTION 13: Disposal considerations            |  |
| 3.1. Waste treatment methods                  |  |
| Waste disposal recommendations                | : Incinerate, dispose in sanitary landfill - if permitted. Consult the appropriate authorities about waste disposal. Dispose in a safe manner in accordance with local and national regulations. Dispose of contents and container to comply with applicable local, state, national and international regulation |
| Additional information                        | : Do not re-use empty containers. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources.  |
| Ecology - waste materials                     | : Avoid release to the environment.  |
| ECTION 14: Transport information              |  |
| accordance with DOT                           |  |
| ot regulated for transport                    |  |
| dditional information                         |  |
| Other information                             | : No supplementary information available.  |
| report by see                                 |  |
| ransport by sea                               |  |
| ot regulated for transport                    |  |
| ir transport                                  |  |
