

PK CPF=20^

Glutaraldehyde/Lanolin Based Arterial Fluid with Entrone and AD-P

PK is a glutaraldehyde arterial fluid which contains Entrone for achieving penetration to the point of complete saturation and AD-P for control of aldehyde action to obtain better diffusion and improvement of cosmetic effect. In addition, PK contains ultrafine lanolins and cosmetic oils to prevent dehydration and produce a natural look and texture to tissues. PK has a superior sanitizing action due to the glutaraldehyde present. PK is suitable for use in all normal embalming situations. PK is not recommended in cases of edema or advanced decomposition.

Notes:

- A A value assigned to all Champion fluids ranking them on the basis of preservative ability using recommended dilutions in normal cases. The Champion Preservative Factor is not index but can equal it in certain fluids. It is derived from the total chemical composition of each fluid and results of extensive field research. The Champion Preservative Factor can be used by the embalmer to predict the reactivity, preservative value and firming action of Champion fluids.
- B Add Champion Coloro Dyes as needed to achieve desired cosmetic effect.
- 1 For proper water conditioning and pH balance to maximize fluid efficiency (if using soft water reduce amount to 2-3 ozs.)
- 2 These are recommended amounts for normal cases. Additional amounts of fluid will be needed for cases with higher aldehyde demand such as cancer, renal and liver diseases with their complications, institutional cases and other wasting diseases, delayed embalming cases, edema and bodies subjected to extensive drug therapy.
- 3 For increased aldehyde action of fluid with improved rigidity and preservation. (Increases preservative factor of fluid without inducing dehydration or other unwanted effects.)
- 4 For maximum rehydration of tissues. Restores moisture in cases of dehydration or emaciation. Use in last I to 1-1/2 gallons of solution with intermittent or restricted drainage.

BEFORE USING, READ SAFETY DATA SHEET. FOR PROFESSIONAL EMBALMING USE ONLY.

SECTION 4: First aid measures

4.1. Description of first aid measures

First-aid measures general

: Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).

First-aid measures after inhalation

: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if necessary. Immediately get medical attention.

First-aid measures after skin contact

: Remove affected clothing and wash all exposed skin area with mild soap and water, followed by warm water rinse. If skin irritation occurs: Get medical attention.

11/19/2018 EN (English) 2/10

Safety Data Sheet

according to the federal final rule of hazard communication revised on 2012 (HazCom 2012)

: In case of contact with eyes, rinse immediately with plenty of flowing water for 10 to 15 minutes First-aid measures after eye contact holding eyelids apart. Subsequently consult an ophthalmologist. Remove contact lenses, if present

and easy to do. Continue rinsing. Seek medical attention immediately.

First-aid measures after ingestion

If swallowed, rinse mouth with water (only if the person is conscious). Call a POISON CENTER. Obtain emergency medical attention. Give water or milk if the person is fully conscious. Never give anything by mouth to a person who is not fully conscious. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs.

4.2. Most important symptoms and effects, both acute and delayed

: Causes damage to organs. Symptoms/injuries

Symptoms/injuries after inhalation Harmful if inhaled. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory irritation. Inhalation of concentrated vapors may cause serious damage to the

lining of the nose, throat, and lungs. Depression of the central nervous system, headaches, dizziness, drowsiness, loss of coordination. Difficulty in breathing. Danger of serious damage to health by prolonged exposure through inhalation. May cause cancer by inhalation. Causes

damage to liver through prolonged or repeated exposure if inhaled.

Symptoms/injuries after skin contact Toxic in contact with skin. Repeated exposure to this material can result in absorption through skin

causing significant health hazard. May cause an allergic skin reaction. Causes skin irritation.

Redness. Dermatitis.

Symptoms/injuries after eye contact Causes serious eye damage. Can cause blindness.

Harmful if swallowed. May cause burns or irritation of the linings of the mouth, throat, and Symptoms/injuries after ingestion

gastrointestinal tract. Ingestion may cause nausea and vomiting. Can cause blindness. Death in

extreme cases.

Indication of any immediate medical attention and special treatment needed

No additional information available

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media : Foam. Dry powder. Carbon dioxide. Water spray. Sand.

Unsuitable extinguishing media : Do not use a solid water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture

Explosion hazard : Heating will cause pressure rise with risk of bursting and subsequent explosion. May form

flammable/explosive vapor-air mixture. Vapors can travel considerable distances to a source of

ignition where they can ignite, flash back, or explode.

Advice for firefighters

Firefighting instructions : Exercise caution when fighting any chemical fire. Prevent fire-fighting water from entering

environment.

Protective equipment for firefighters : Do not enter fire area without proper protective equipment, including respiratory protection. Wear

a self contained breathing apparatus.

: Special danger of slipping by leaking and spilling product. Thermal combustion may release Other information carbon monoxide and dioxide. unburned hydrocarbons. Toxic gases and fumes may be released

in a fire.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

General measures : Avoid breathing dust, fume, mist, spray, vapors. Stop leak if safe to do so. Surface will become slippery when wet or damp. No naked lights. No smoking. Take precautionary measures against

static discharge.

6.1.1. For non-emergency personnel

Emergency procedures : Evacuate unnecessary personnel.

6.1.2. For emergency responders

Protective equipment : Equip cleanup crew with proper protection.

Emergency procedures · Ventilate area

Environmental precautions

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up

: Soak up spills with inert solids, such as clay or diatomaceous earth as soon as possible. Collect spillage. Store away from other materials. Collect all waste in suitable and labelled containers and dispose according to local legislation. Ensure all national and local regulations are observed. Thoroughly wash the area with water after a spill or leak clean-up. Dispose of waste according to applicable legislation.

6.4. Reference to other sections

See Heading 8. Exposure controls and personal protection.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Precautions for safe handling

: Obtain special instructions before use. Avoid contact with skin and eyes. Work in a well-ventilated area. When not in use, keep containers tightly closed. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work.

Hygiene measures

: Do not eat, drink or smoke when using this product. Handle in accordance with good industrial hygiene and safety practices.

7.2. Conditions for safe storage, including any incompatibilities

Technical measures

: Provide local exhaust or general room ventilation. A washing facility for eye and skin cleaning purposes should be present.

Storage conditions

: Keep out of reach of children. Keep only in the original container in a cool, well-ventilated place away from highly flammable substances. Keep container tightly closed and dry. Store away from direct sunlight or other heat sources.

Incompatible materials : Strong acids, bases. Oxidizing agents.

7.3. Specific end use(s)
